Tired of your messages getting lost?

THE OUTBOX PATTERN TO THE RESCUE!

Ismaïl NGUYEN

A software craftsman

What's the Outbox Pattern?

🤔

Imagine you're sending a super important letter, but the mailman keeps losing it!

The Outbox Pattern makes sure your letter gets delivered safely, every single time.

Here's how it works:

1. You write your letter and put it in your outbox (like a to-do list for letters)
2. Your trusty assistant checks the outbox and hand-delivers each letter
3. Once the letter is delivered, it gets crossed off the outbox list

Why use the Outbox Patttern?

✅ No more lost letters!

✅ You can focus on writing, while your assistant handles delivery

✅ Keeps everything organized and on track

✅ Easy communication between you and your pen pals

So don't let your messages get lost in the shuffle! 📫

Implement the Outbox Pattern and enjoy reliable, worry-free communication.

Your letters (and data) will always find their way home safe and sound! 🏡

Not an actual mailman.

Please use responsibly with your distributed systems. 😉
